

### USDA America's Harvest Box

*“USDA America’s Harvest Box is a bold, innovative approach to providing nutritious food to people who need assistance feeding themselves and their families – and all of it is home grown by American farmers and producers. It maintains the same level of food value as SNAP participants currently receive, provides states flexibility in administering the program, and is responsible to the taxpayers.”*

*- Secretary Sonny Perdue*

### USDA America's Harvest Box

- Under the USDA America’s Harvest Box proposal, all Supplemental Nutrition Assistance Program (SNAP) participating households receiving \$90 per month or more in benefits will receive a package of nutritious, 100-percent U.S. grown and produced food. Approximately 16.4 million households, or about 81 percent of SNAP households would be impacted by this proposal.
- The amount of food received per household would be scaled to the overall size of the household’s SNAP allotment, ultimately representing about half of their benefits. SNAP participants would receive domestically-sourced and produced food in lieu of a portion of their SNAP benefits.
- USDA would utilize a model similar to that currently used to distribute USDA Foods to other nutrition assistance programs to provide staple, shelf-stable foods (such as shelf-stable milk, juice, grains, ready-eat-cereals, pasta, peanut butter, beans, canned meat, poultry or fish, and canned fruits and vegetables) to SNAP households at approximately half the retail cost.
- This proposal creates a new approach to nutrition assistance that combines retail-based SNAP benefits with delivery of USDA America’s Harvest Boxes supporting the President’s leadership on Buy American. This proposal is cost-effective, enhances the integrity of SNAP, and provides for states’ flexibility in administration of the program.
- The remainder of the household’s benefits will still be provided via the current Electronic Benefit Transfer card.
- This proposal would save \$129.2 billion over the ten-year period between Fiscal Year (FY) 2019 and FY 2028. This estimate accounts for about \$2.5 billion annually in additional administrative funds for states.
- USDA currently purchases a wide variety of food for several nutrition assistance programs, including the National School Lunch Program, the Commodity Supplemental Food Program, The Emergency Food Assistance Program, and the Food Distribution Program on Indian Reservations.
- States will be given substantial flexibility to distribute these food benefits to participants. States can distribute these boxes through existing infrastructure, partnerships, and/or directly to residences through commercial and/or retail delivery services.
