Dr. Norman E. Borlaug
Calle Viena 26,
Mexico D.F. Mexico

Dear Dr. Borlaug:

Under separate cover I am sending you by air mail two samples of wheat to substitute for the non-hybrid entries 17 and 20 in the tropical ecotype nursery. These are as follows:

For Entry No.	Parents	Cross No.	Gen.
RF 1352-17	(Hope x W.O. Sel. 30) x Austin	3788	6
RF 1356-20	(Hope x Martin) x Austin	3789	6

These entries should give segregates that are resistant to stem rust, leaf rust, loose smut, and bunt.

I arrived home safely on Monday, September 13, and wish to take this opportunity to thank you again for the royal welcome which you gave me in Mexico.

Very truly yours,

E. S. McFadden
