

# Status of Notifications to Agricultural Operations Pursuant to Section 335 of the Fiscal Year 2021 National Defense Authorization Act

**July 2021**

Office of the Under Secretary of Defense  
for Acquisition and Sustainment

The estimated cost of this report or study for the Department of Defense is approximately \$581,000 in Fiscal Year 2021. This includes \$196,000 in expenses and \$386,000 in DoD labor.

**APPENDIX**

Status of Agricultural Operation Notifications

## **I. INTRODUCTION**

Section 335 of the William M. Mac Thornberry National Defense Authorization Act (NDAA) for Fiscal Year (FY) 2021 (Public Law 116-283), requests a report on the Department of Defense's (DoD's) status of providing notifications to agricultural operations located within one mile down gradient of a Military Installation or National Guard facility where a "covered" per- and polyfluoroalkyl substances (PFAS)<sup>1</sup> (1) has been detected in groundwater on base; (2) has been hydrologically linked to a local agricultural or drinking water source; and (3) is known or suspected to be the result of a PFAS release at a Military Installation or National Guard facility located in the United States.

## **II. BACKGROUND**

PFAS is a national issue that requires national solutions. DoD is proactively taking action to reduce the risks of PFAS exposure to human health. DoD's cleanup program follows the federal cleanup law (the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), also known as "Superfund") to address DoD releases of PFAS and determine the appropriate cleanup actions based on risk.

## **III. STATUS OF AGRICULTURAL OPERATIONS NOTIFICATIONS**

The Department recently notified agricultural operations consistent with the requirement in Section 335 of the NDAA for FY 2021. DoD worked in consultation with the U.S. Department of Agriculture to obtain names and addresses of agricultural operations near Military Installations or National Guard facilities. DoD then reviewed its data from the installations where we are conducting PFAS cleanup assessments to determine if on-installation groundwater could be hydrologically connected to down gradient agricultural operations within one mile of the installation.

During the period of March 1 through March 31, 2021, the DoD Components have sent notifications to 2,143 identified agricultural operations pursuant to Section 335 of the NDAA for FY 2021. The appendix provides the number and approximate locations of agricultural operations notified; the associated Military Installation or National Guard facility; and the covered PFAS and levels detected in groundwater on base. Providing these agricultural notifications does not necessarily mean that PFAS is in the groundwater at the agricultural location or that cleanup is required.

DoD is committed to fulfilling its PFAS cleanup responsibilities, and conducts its cleanup program in coordination with state and federal environmental regulators, and provides opportunities for the local community to participate in this cleanup process. A list and map of installations where DoD is performing an assessment of PFAS use or potential release is available on [defense.gov/PFAS](https://defense.gov/PFAS).

---

<sup>1</sup> "Covered PFAS" is defined as perfluorooctane sulfonate (PFOS) that has been detected in groundwater above 70 parts per trillion (ppt), individually or in combination with perfluorooctanoic acid (PFOA); and/or PFOA that has been detected in groundwater above 70 ppt, individually or in combination with PFOS; and/or perfluorobutanesulfonic acid that has been detected in groundwater above 40 parts per billion.

#### **IV. CONCLUSION**

DoD is proactively taking action to reduce the risks of PFAS exposure to human health by following the CERCLA process to address releases resulting from DoD activities. The DoD Components will continue to prioritize this effort and send additional notifications as agricultural operations are identified pursuant to Section 335 of the NDAA for FY 2021.

Appendix: Status of Agricultural Operation Notifications

**Footnotes:**

- 1:** The agricultural operations notified are located within one mile down gradient of a Military Installation or National Guard facility where covered per- and polyfluoroalkyl substances (PFAS) (1) has been detected in groundwater on base; (2) has been hydrologically linked to a local agricultural or drinking water source; and (3) is known or suspected to be the result of a PFAS release at a Military Installation or National Guard facility located in the United States.
- 2:** Section 335 of the NDAA for FY 2021 defines "covered PFAS" as perfluorooctane sulfonate (PFOS) that has been detected in groundwater above 70 parts per trillion (ppt), individually or in combination with perfluorooctanoic acid (PFOA); and/or PFOA that has been detected in groundwater above 70 ppt, individually or in combination with PFOS; and/or perfluorobutanesulfonic acid (PFBS) that has been detected in groundwater above 40 parts per billion.

[Date]

[Agricultural Operation Owner/Operator]

[Agricultural Operation Owner/Operator Address Line 1]

[Agricultural Operation Owner/Operator Address Line 2]

Dear [Agricultural Operation Owner/Operator],

I am contacting you, in accordance with the requirements of Section 335 of the 2021 National Defense Authorization Act provided in Attachment 1. The [DoD Component] sampled groundwater at [Military Installation or National Guard Facility] where [Military Installation or National Guard Facility] activities may have released per- and polyfluoroalkyl substances (PFAS). Our sampling detected [perfluorooctane sulfonate (PFOS), perfluorooctanoic acid (PFOA), and/or perfluorobutane sulfonic acid (PFBS)] above the notification levels which can be found in Attachment 2. Your agricultural operation is located within one mile downgradient of [Military Installation or National Guard Facility]. I obtained your name and address from the U.S. Department of Agriculture as part of our consultation with them in providing this notice.

[DoD Component] is committed to proactively addressing [PFOS/PFOA/PFBS] and follows the federal cleanup law, the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA), for all chemicals in our cleanup program. [DoD Component] follows the CERCLA process to fully investigate a potential release of these chemicals and determine the appropriate cleanup actions based on risk. [DoD Component] is first addressing sites that pose the greatest potential risk to human health, such as PFOS and PFOA in drinking water. The [Military Installation or National Guard Facility] will coordinate its investigation with the appropriate state regulators and provide opportunities for public participation. [Military Installation or National Guard Facility] will also incorporate any relevant federal or state standards into the cleanup process as final cleanup standards as required by federal law. We encourage you to visit [Military Installation or National Guard Facility website, Administrative Record location, Restoration Advisory Board contact, and/or number to call] to learn more about the ongoing cleanup actions at [Military Installation or National Guard Facility]. [Military Installation or National Guard Facility] will seek your approval prior to conducting response activities on your property, including an investigation, if determined necessary.

[PFOS, PFOA, and/or PFBS are/is] part of a larger class of man-made chemicals known as per- and polyfluoroalkyl substances (PFAS). Scientists are still studying the health effects of exposure to PFAS and they are the subject of increasing regulation worldwide. At this time, there are no established federal standards for PFAS in groundwater, livestock, food commodities, and drinking water, or known federal restrictions for the sale of agricultural products that have been irrigated or watered with water containing PFAS. Relevant governmental information regarding the health and safety of the covered PFAS detected, including relevant State standards for PFAS in groundwater, livestock, food commodities and drinking water, and any known restrictions for sale of agricultural products that have been irrigated or watered with water containing PFAS is found in Attachment 3.

[DoD Component] will work with you, [State Regulatory Agency and if applicable add EPA Region] to share information on our ongoing efforts to ensure the protection of human health and the environment. If you have any questions or concerns about this matter, please contact [Military Installation/National Guard Facility POC] at [phone] or by email at [email].

Sincerely,

[POC], [Military Installation/National Guard Facility]

Attachments: as stated

DRAFT

SEC. 335. NOTIFICATION TO AGRICULTURAL OPERATIONS LOCATED IN AREAS EXPOSED TO DEPARTMENT OF DEFENSE PFAS USE.

(a) NOTIFICATION REQUIRED.—Not later than 60 days after the date of the enactment of this Act, the Secretary of Defense, in consultation with the Secretary of Agriculture, shall provide a notification described in subsection (b) to any agricultural operation located within one mile down gradient of a military installation or National Guard facility where covered PFAS—

- (1) has been detected in groundwater;
- (2) has been hydrologically linked to a local agricultural or drinking water source, including a water well; and
- (3) is suspected to be, or known to be, the result of the use of PFAS at an installation of the Department of Defense located in the United States or State-owned facility of the National Guard.

(b) NOTIFICATION REQUIREMENTS.—The notification required under subsection (a) shall include the following information:

- (1) The name of the Department of Defense installation or National Guard facility from which the covered PFAS in groundwater originated.
- (2) The specific covered PFAS detected in groundwater.
- (3) The levels of the covered PFAS detected.
- (4) Relevant governmental information regarding the health and safety of the covered PFAS detected, including relevant Federal or State standards for PFAS in groundwater, livestock, food commodities and drinking water, and any known restrictions for sale of agricultural products that have been irrigated or watered with water containing PFAS.

(c) ADDITIONAL TESTING RESULTS.—The Secretary of Defense shall provide to an agricultural operation that receives a notice under subsection (a) any pertinent updated information, including any results of new elevated testing, by not later than 15 days after receiving validated test results.

(d) REPORT TO CONGRESS.—Not later than 90 days after the date of the enactment of this Act, and annually thereafter, the Secretary of Defense shall submit to the Committee on Agriculture, Nutrition, and Forestry of the Senate and the Committee on Agriculture of the House of Representatives a report on the status of providing notice under subsection (a). Such report shall include, for the period covered by the report—

- (1) the approximate locations of such operations relative to installations of the Department of Defense located in the United States and State-owned facilities of the National Guard;
- (2) the covered PFAS detected in groundwater; and
- (3) the levels of covered PFAS detected.

(e) DEFINITIONS. —In this section:

(1) The term “covered PFAS” means each of the following:

(A) Perfluorooctanoic acid (commonly referred to as “PFOA”) (Chemical Abstracts Service No. 335–67–1) detected in groundwater above 70 parts per trillion, individually or in combination with PFOS.

(B) Perfluorooctane sulfonic acid (commonly referred to as “PFOS”) (Chemical Abstracts Service No. 1763–23– 1) detected in groundwater above 70 parts per trillion, individually or in combination with PFOA.

(C) Perfluorobutanesulfonic acid (commonly referred to as “PFBS”) (Chemical Abstracts Service No. 375–73– 5) detected in groundwater above 40 parts per billion.

(2) The term “PFAS” means a perfluoroalkyl or polyfluoroalkyl substance with at least one fully fluorinated carbon atom, including the chemical GenX.

[Military Installation/National Guard Facility]  
 Groundwater Detection Sampling Range

Attachment 2

	<b>PFOS</b>	<b>PFOA</b>	<b>PFBS</b>
<b>Notification Level</b>	70 ppt	70 ppt	40 ppb
<b>Range Detected</b>	[if > 70ppt]	[if > 70 ppt]	[if > 40 ppb]

PFAS=per- and polyfluoroalkyl substances

PFBS = perfluorobutane sulfonic acid

PFOA = perfluorooctanoic acid

PFOS = perfluorooctane sulfonate

ppt = parts per trillion

ppb = parts per billion

Michigan cleanup (drinking water) criteria	MI Rule 299, Table 1	Drinking Water: PFOS: 16 ppt PFOA: 8 ppt PFBS: 420 ppt  Groundwater Surface Water Interface (GSI): PFOA: 12000 ppt PFOS: 12 ppt
Michigan Toxic Substances	Rule 323.1057, Water Quality Values	PFOS: 11 ppt PFOA: 420 ppt

State	Citation	Relevant PFAS Standard
Minnesota health risk limits for groundwater (used as drinking water)	MN Admin Rules, Part 4717.7860	PFOA: 35 ppt PFOS: 300 ppt PFBS: 7000 ppt
New Hampshire MCLs	N.H. Code Admin. R. Env-Dw 705.06	PFOA: 12 ppt PFOS: 15 ppt
New Hampshire groundwater (suitable for drinking water) contaminated site management rule	NH Code of Admin. Rules, Chapter Env-Or 603.03, Table 600-1	PFOS: 15 ppt PFOA: 12 ppt
New Jersey MCLs	N.J.A.C. 7:10-5	PFOS: 13 ppt PFOA: 14 ppt
New Mexico		May need to reference State restrictions on sale of milk and cattle for dairy near Cannon AFB
New York MCLs	Subpart 5-1 of Title 10 of the Official Compilation of Codes, Rules and Regulations of the State of New York	PFOA: 10 ppt PFOS: 10 ppt
North Carolina groundwater (used for drinking water) classification rule	NC Admin. Code 02L.0202	PFOA: 2,000 ppt
Rhode Island Groundwater Quality Standards and Preventive Action Limits	250-RICR-150-05-3	PFOA: 70 ppt PFOS: 70 ppt
Texas Protective Concentration Limits (PCLs)	30 TAC §350	PFOA: 290 ppt PFOS: 560 ppt PFBS: 34,000 ppt
Vermont Hazardous Waste Management Regulations	VT DEC Chapter 7	PFOS and PFOA: 20 ppt (separately and combined)
Vermont groundwater protection (as high quality drinking water) rule	VT DEC Chapter 12, Appendix 1	PFOS and PFOA: 20 ppt (combined)
Vermont MCLs	VT DEC Chapter 21, Table 6-1	PFHxS, PFHpA, PFNA, PFOS, and PFOA: 20 ppt (combined)

PFBS=perfluorobutanesulfonic acid      PFOS= perfluorooctane sulfonate

PFDA=perfluorodecanoic acid

PFHpA=perfluoroheptanoic acid

PFHxS=perfluorohexane sulfonic acid

PFNA=perfluorononanoic acid

PFOA=perfluorooctanoic acid
